

Software cache width vs. simulated time

10-read workload, 50 MB DB, atomics-contention removed. Dashed line: 4-way time.
Width shown = the SOFTWARE S2 lookup-cache's associativity (kraken2's own code).
Real Luna HARDWARE cache is fixed and unchanged throughout: L1d 48KB/12-way,
L1i 32KB/8-way, L2 2MB/16-way, L3 105MB/15-way (96 cores/socket).
