

Memory footprint touched, by SOFTWARE cache width and database size

50-read workload. Fewer lines touched indicates fewer cold-memory probes into the underlying hash table. Width shown = the SOFTWARE S2 lookup-cache's associativity. Real Luna HARDWARE cache is fixed throughout: L1d 48KB/12-way, L1i 32KB/8-way, L2 2MB/16-way, L3 105MB/15-way (96 cores/socket), 2.1GHz.
